

HOW TO TALK TO YOUR DOCTOR ABOUT NUBEQA

(Pronounced new-BEH-kah)

INDICATION

NUBEQA® (darolutamide) is a prescription medicine used to treat adults with prostate cancer that has not spread to other parts of the body and no longer responds to medical or surgical treatment that lowers testosterone (non-metastatic castration-resistant prostate cancer or nmCRPC).

It is not known if NUBEQA is safe and effective in women or children.

IMPORTANT SAFETY INFORMATION

Before taking NUBEQA, tell your healthcare provider about all your medical conditions, including if you:

- have heart problems, high blood pressure, diabetes, or high amounts of fat or cholesterol in your blood (dyslipidemia)

1 | Please see additional Important Safety Information throughout and the full [Prescribing Information](#).

NUBEQA®
(darolutamide) 300 mg tablets

Starting a conversation about your prostate cancer that is no longer responding to hormone therapy* and has not spread to other parts of the body can be stressful and confusing, even when you are speaking with your healthcare team!

*Hormone therapy includes drug treatments or surgery that lowers testosterone.

WHAT TO DISCUSS WITH YOUR HEALTHCARE TEAM

- How do I know if my cancer is no longer responding to my current hormone therapy?
- How do I monitor and keep track of my cancer? What tests should we be running?
- What are the next options in my treatment journey?

TIP Talk with your partner or caregiver about changes you are experiencing. See page 5 for more guidance.

2 | Please see additional Important Safety Information throughout and the full [Prescribing Information](#).

NUBEQA®
(darolutamide) 300 mg tablets

CONSIDER THE APPROPRIATE TREATMENT

- What are my treatment options?
 - Is NUBEQA a good option for me?
-
-

TIP

Be sure to discuss your daily priorities and any concerns you may have about treatment with your healthcare team.

IMPORTANT SAFETY INFORMATION (cont'd)

Before taking NUBEQA, tell your healthcare provider about all your medical conditions, including if you (cont'd):

- have a history of seizures, brain injury, stroke, or brain tumors
- have kidney or liver problems
- are pregnant or plan to become pregnant. NUBEQA can cause harm to your unborn baby and loss of pregnancy (miscarriage)
- have a partner who may become pregnant. Males who have female partners who may become pregnant should use effective birth control (contraception) during treatment and for 1 week after the last dose of NUBEQA. Talk with your healthcare provider about birth control methods
- are breastfeeding or plan to breastfeed. It is not known if NUBEQA passes into breast milk

GETTING STARTED ON NUBEQA

- How can I get started on NUBEQA?

TIP

Many products, including NUBEQA, offer free trial programs, financial assistance, and other patient support programs. Contact Access Services by Bayer™ for more information.

To find out more about how these programs and other support services can help, call Access Services By Bayer.

833-288-8374

MONDAY-FRIDAY

9:00 AM – 6:00 PM (EST)

NUBEQA IS HERE FOR YOU

TIP

Save the Access Services by Bayer number in your phone so it doesn't appear as spam, and answer all calls from the program.

IMPORTANT SAFETY INFORMATION (cont'd)

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. NUBEQA may affect the way other medicines work and other medicines may affect how NUBEQA works.

You should not start or stop any medicine before you talk with the healthcare provider that prescribed NUBEQA.

Know the medicines you take. Keep a list of them with you to show to your healthcare provider and pharmacist when you get a new medicine.

PREPARING FOR YOUR VISIT

Before you meet with your healthcare team, take a minute to check in with your partner or caregiver and answer some simple questions about your day-to-day life. This can help your doctor understand how NUBEQA can fit into your current lifestyle and treatment plan.

What is your current treatment plan?

How do you spend your free time?

(E.g., golfing, playing with your grandchildren, meeting with your friends daily)

**Of the activities you've listed, have you noticed any changes while doing them?
Please describe.**

(E.g., used to play 18 holes of golf, now only 9; only going out with friends 1 time per week instead of 3)

Are you having difficulty doing your regular activities that require focus, including reading, using the computer, etc.?

Have you noticed any changes to your daily routine over the last 6 or 12 months?

(E.g., time of waking up or going to sleep; size and frequency of meals)

What other medical conditions do you have? What other medicines do you take?

IF HORMONE THERAPY* IS NO LONGER ENOUGH, **TAKE ACTION**

*Hormone therapy includes drug treatments or surgery that lowers testosterone.

IMPORTANT SAFETY INFORMATION (cont'd)

NUBEQA may cause serious side effects, including:

- **Heart disease.** Blockage of the arteries in the heart (ischemic heart disease) that can lead to death has happened in some people during treatment with NUBEQA. Your healthcare provider will monitor you for signs and symptoms of heart problems during your treatment with NUBEQA. Call your healthcare provider or get medical help right away if you get chest pain or discomfort at rest or with activity, or shortness of breath during your treatment with NUBEQA.
- **Seizure.** Treatment with NUBEQA may increase your risk of having a seizure. You should avoid activities where a sudden loss of consciousness could cause serious harm to yourself or others. Tell your healthcare provider right away if you have loss of consciousness or seizure.

The most common side effects of NUBEQA in people with nmCRPC include:

- increase in liver function tests
- decreased white blood cells (neutropenia)
- feeling more tired than usual
- arm, leg, hand, or foot pain
- rash

NUBEQA may cause fertility problems in males, which may affect the ability to father children. Talk to your healthcare provider if you have concerns about fertility.

These are not all the possible side effects of NUBEQA.

Call your healthcare provider for medical advice about side effects. You may report side effects to the FDA at [1-800-FDA-1088](https://www.fda.gov/medwatch).
